Cleanse

Start by removing any makeup with an oil-based product. Some makeup hangs on longer than others! Next, work liquid cleanser into the skin for up to a minute to remove any residue.

Exfoliate

Lather your facial or body buff with an exfoliating serum, such as Salicylic Acid. Then gently scrub to get rid of skin debris and clear out your pores. Pay special attention to your elbows, feet, and knees – they're especially prone to dryness.

Renew

Now that your skin is feeling fresh and clear, finish off with your favorite moisturizing lotion. If you have a serum or other a body lotion, now is the time to apply it!

Skin So Smooth!

"My skin has never felt smoother...I didn't even know It could get smoother!"
